

October 2015 Technical Meeting

Retrofitting Your SCADA With The Latest Technologies

Join us on Tuesday, October 20th as we learn from **Wayne Barkley and Keith Girup – Metropolitan Industries** as our guest speaker for the October 2015 section meeting. Metropolitan Industries will discuss a variety of topics related to supervisory control and data acquisition systems.

Keith Girup has industry experience as a municipal sales engineer for Metropolitan Industries. Keith is a graduate of Iowa State University, holding a B.S. in Industrial Technology. He has design and sales experience in equipment related to various water, wastewater and stormwater pumping, control, treatment and SCADA systems. Keith currently serves as Metropolitan's municipal salesperson for the south suburbs of Chicago and northwest Indiana.

Wayne Barkely leads our programming department which includes facilitating communication between engineering and control architecture for projects. In addition to overseeing programming Wayne leads our product development team tasked with the innovation of the latest solutions Metropolitan Industries has available.

Topics to be Covered:

- SCADA communication methods
- Software, hardware requirements and options
- Incorporating security and surveillance into your system
- Report generating
